

TEEN OPPORTUNITIES!

Do you have an interest in science, art, and the great outdoors?

Apply to become a High School Comunidad Scientist, Teen Volunteer, or Teen Science Scholar!

HIGH SCHOOL COMUNIDAD SCIENTIST IN THE GENETICS OF TASTE LAB

Support the community-based Genetics of Taste Lab by collecting, processing and preparing DNA samples, sequencing DNA and entering data into the database. Minimum of 20 shifts (100 hours) /year during school breaks, holidays, evenings and special events. Open to teens who will be juniors or seniors in the spring of 2018. Bus passes and training will be provided. Interview dates for select applicants will be on 10/26, 11/07 and 11/29/ .

Applications open NOW at <http://www.dmns.org/join/volunteering/genetics-of-taste-lab-community-scientists/>

For more information please contact: esmarie.swisher@dmns.org

TEEN VOLUNTEERS

Bring the Museum to life for our youngest guests by greeting and orienting program participants, and leading activities in the Discovery Zone, our exhibits, and summer camps. Open to teens between the ages of 14-18 who enjoy working with children . Minimum 120 hours through out the year, primarily in the summer. Bus passes and training will be provided. Applications will be posted on our website soon.

For more information contact allie.skaer@dmns.org

TEEN SCIENCE SCHOLARS

Teen Science Scholars engage with scientists and collections staff on real Museum projects! This hands-on internship program is designed to inspire high school students who are interested in pursuing science-related careers, particularly teens from groups underrepresented in the sciences. (e.g., individuals who are Hispanic, Latino, African American, Native American, Southeast Asian, LGBTQ, individuals with low socioeconomic status, and individuals with disabilities). Open to teens who will be juniors or seniors in the fall of 2018. Bus passes and training will be provided. Minimum 150 hour commitment during summer. Applications will be posted on our website soon.
